ACTION:

Dear [REDACTED]

We are pleased to see that you have taken the very wise decision to do as we demanded [REDACTED] the town council. Kudos, however, to the bare-faced lie about it being for 'personal reasons' (typical politician). We know the truth and so will everyone else soon.

It is interesting that it takes a direct threat to your personal safety to make you finally listen and take appropriate action. We are sorry that it had to come to this, but this is what happens when the people you are supposed to serve and represent are ignored, bullied, ridiculed, gaslighted and insulted for years.

However, there is a long, long way to go.

Whilst you [REDACTED] are now safe from us, we will be transferring our attention to the new leader of the town council (whoever that turns out to be). Remember we are apolitical, and we don't care which political party they represent. We only care about their actions.

You may wish to warn them (and the rest of the council) that they need to start working in the interests of the residents of this town or we will be coming for them. I hardly need to remind you how easy that would be.

In addition, we have collected direct, physical evidence of the contempt that town (district and county) councilors hold for the people they are supposed to serve, and we may publish these at the most opportune moment to cause maximum damage and embarrassment. Watch this space.

However, for now we will carefully watch the activities of the town council and decide what action to take should we be displeased.

As you (and MSDC and WSCC) seem to be clueless as to what people actually want, we will give you some pointers (both specific and general):

- Give us our promised new town centre and stop driving out businesses so you can convert the buildings to residential properties.
- Abolish car parking charges.
- Properly fix the potholes.
- Clear the drains.
- Stop any more house building on green belt land.
- Reinstate weekly rubbish collections.
- Paint over the stupid rainbow benches.
- Preserve the allotments.
- Reinstate the mini roundabout in the town centre.
- Stop installing electric charging points.
- Sort out the McDonalds roundabout once and for all.
- Promote Britishness and stop pandering to minorities.
- Stop flooding the town with foreigners and immigrants (and reminding the local Muslim community that the UK is a Christian country).
- Stop all unwanted woke and eco initiatives.
- Reimburse residents for the failed Place and Connectivity scheme.
- Become visible and accountable and remember at all times that you are public servants.

- Give the residents an open and free forum where they can voice their valid opinions and not be insulted, belittled and accused of hate speech by arrogant councilors.
- Stop playing politics and just get things done.

Once we see progress in ALL the above areas then we will stand down and councilors can walk the streets in safety.

As previously stated – PLEASE DON'T FORCE OUR HAND (we have nothing to lose, remember).

We look forward to seeing some positive progress very soon.

WE ARE WATCHING!

BURGESS HILL TOWN COUNCIL
